

Number : 25/22
Subject : Commission rates
To : Fishermen and buyers of pelagic fish
Place : Bergen
Date : 24 June 2022

To finance Norges Sildesalgslags' costs related to direct sale or transaction of the catch, a commission is charged. In general, the commission is calculated on basis of the sales value of the catch.

From 1 July 2022 until further notice the following commission rates are in effect:

- a) For deliveries of fresh pelagic fish, not processed, but transported in bulk and chilled, a commission rate of 0,55 % applies.
- b) For deliveries of processed pelagic products, a commission rate of 0,35% applies. The basis for this rate is 90 % of the gross sales value. However, the catch value used for commission charge cannot be lower than the minimum price for corresponding landings of fresh pelagic fish to Norway.

Best regards
NORGES SILDESALGSLAG
